When our passion for coffee became irresistible, we decided to turn this love into a business and started to produce "coffee processing machines and equipment" for coffee lovers all around the world

ABOUT US

Our company, KUBAN, was established in 1996 by Ahmet Demirden in İzmir, Turkey. When our passion for coffee became irresistible, we decided to turn this love into a business and started to produce “coffee processing machines and equipment” for coffee-lovers all around the world.

We have expanded our product range since the beginning of our operations, and now, we serve both the domestic and international markets. Nearly 25 years of experience in the coffee industry has brought us mastery. Moreover, we constantly improve our products and services on the basis of customer satisfaction with our dynamic and disciplined team.

As the KUBAN Family, we represent our country at many international fairs on coffee and coffee equipments. In addition to in-house R&D activities, we try to set a high standard of quality in the industry by keeping up with technological innovations and keeping the bar high at all times.

We pioneer this passion by using high-quality raw materials in all of our products that we produce. We stand out with our high-performance products, which are specially combined by our expert engineers. Our machines can be customized to customer demands.

KUBAN SUPREME SERIES-6 KG

Innovation meets master roasting in one compact machine now! It has 6 kg green coffee beans capacity per batch. It has highest qualified heat insulation to obtain the exclusive roasting experience for users.

Kuban Supreme 6 will be the most favorite roasting machine among the coffee shops and coffee lovers all over the world.

PRODUCT FEATURES

Proportional Flame Level: The flame can be adjusted gradually, so, it provides the same roasting every time.

Renovated Inside Blade Design of Drum: Increasing the output speed of roasted coffee thanks to homogeneous heating.

Homogeneous Heat Distribution with 55% Emptiness Drum Volume: Increasing conventional heating by minimizing contact of beans with the drum.

Casting Front Cover of Drum: Overheating spot is prevented from front cover.

Up to 70 RPM Adjustable Drum: It allows every type of roasting such as slow or aggressive roasting techniques.

Increased Drum Insulation: Ensuring the conservation of internal energy by using heated air efficiently.

- Volumetric Airflow Control
- Low Noise Control
- Lower Operating Costs
- Completely Hand Workmanship
- Premium Quality Components
- Removable and Rotatable Cooling Tray
- Separate Cyclone with High Degree of Separation

01 MASTER ROASTERS

KUBAN SUPREME

TECHNICAL SPECIFICATION

MODEL	SUPREME
ROASTING TIMES (MIN)	8-15 min
ROASTING CAPACITY (KG/H)	24 kg/h
BATCH SIZE (KG)	1-6 kg
BURNER POWER	32,5 kW/h
GAS CONSUMPTION - LPG	2,34 m ³
GAS CONSUMPTION - NATURAL GAS	3,38 m ³
ROASTER WEIGHT WITH CYCLONE	450 kg
VOLTAGE	220-380 V
FREQUENCY	50-60 Hz
HEAT SOURCE	LPG - NATURAL GAS - LNG - DIESEL
HEATING SYSTEM	ATMOSPHERIC OR PREMIX
NUMBER OF MOTORS	4-7
POWER CONSUMPTION (kW/h)	1.84 kW/h

SOFTWARE

Our New Roasting Software is specially built up for the **Kuban Supreme** series with advanced technology.

Kuban knows the value of time and offers you time - saving solutions.

Save time thanks to the new Kuban SUPREME software designed to observe, tack, save, export and modify your roasting sessions at anytime.

Kuban Sopreme roasting software allows you to save actions such as flame level, air flaw, drum speed and all required datas must for roasting sessions.

KUBAN BASE

KUBAN BASE SERIES-15 KG

Adjustable RPM of Drum

In order to obtain more consistency in your profile, you are able to modify drum speed up to 70 RPM. Combining this feature with airflow alternation and flame level adjustment offers you to roast more consistent profiles.

Single or Double Wall Drum Option

We design our drums as a single or double-wall with calculated drum wall thicknesses. Users can choose the drum type depending preferred roasting styles.

Adjustable Flame Level

Changing flame level is one of the base parameters of coffee roasting process. **Kuban Base** series offer to interfere the flame level adjustment on every step of your roasting profiles.

Programmable Logic Controller (PLC)

Kuban offers PLC touchscreen controller with its software as optional. Users can create their own unique roasting profile.

Separated Engines for Roasting Process

Roasting and cooling process can be carried out simultaneously.

Control Type

Kuban Base series is produced with manual, software & PLC and fully automatic control.

Customization

Kuban Base roasters are customized in terms of color, logo, finishing, electric (voltage and frequency), heating source and language preferences.

Plug & Play Feature

PLC controller has "Plug & Play" feature that is compatible with advanced roasting softwares for PC.

FEATURES

- Gas pressure responsive automated shutdown system
- Stop button to shut all the system in emergencies
- Digital heat indicator control
- Digital heat indicator & controller
- Aural warning when machine reaches desired temperature

OPTIONAL FEATURES

- Afterburner
- Loader
- Destoner

FREQUENCY	50 - 60 HZ
HEAT SOURCE	LPG - NATURAL GAS - LNG
HEATING SYSTEM	THERMAL TRANSFER - HOT AIR THERMAL TRANSFER
NUMBER OF MOTORS	4
POWER CONSUMPTION (KW/H)	2.24 KW
GAS CONNECTOR	1/2
CONTROL TYPE	MANUAL/SOFTWARE & TOUCH SCREEN/FULLY AUTOMATIC

Completely Hand Workmanship

02 MASTER GRINDERS

02 MASTER GRINDERS KUBAN TURK

KM05 series has been manufactured and developed for more than 20 years and is almost as old as KUBAN. As one of the machines produced by using our knowledge and experience in the best way possible, the **KM05** series has crowned its success by becoming the most-preferred product and proved this with its sales. Mass production with high-quality loomm stainless steel blades.

GRINDING CAPACITY
16 kg/hour - Turkish Coffee

02 MASTER GRINDERS KUBAN BOLD

KUBAN BOLD is the new-generation coffee grinder that we designed and manufactured to meet industrial and retail needs. Thanks to its mechanical structure, it is included in the category of "new generation"

It is ideal not for Turkish coffee but also for Filtre coffee and espresso. The grind size can be adjusted with the adjustment lever on the front panel.

GRINDING CAPACITY
30 kg/hour - Turkish Coffee
50 kg/hour - Espresso
70 kg/hour - Drip Coffee

02 MASTER GRINDERS

KUBAN SHARP

KUBAN SHARP is a semi-industrial coffee grinder. It is used for commercial and industrial purposes to obtain freshly-ground coffee. It has CE Certification and complies with European standards.

With the adjustment lever on the front panel, it can perform 3 different grinding operations; Turkish coffee, espresso and filter coffee. It can grind various grains and spices as well as coffee beans. Thanks to the bag holder clip, it offers instant packaging.

GRINDING CAPACITY

70 kg/hour - Turkish Coffee
90 kg/hour - Espresso
150 kg/hour - Drip Coffee

Red Yellow Black

MASTER GRINDERS

KUBAN SHARP PRO

KUBAN SHARP PRO is an industrial coffee grinder. It is named "Pro" since it combines the latest technology and the highest-quality raw materials.

It is the best solution for industrial mass production with its extremely powerful motor, stainless steel discs of 200 mm and double cooling fans. In addition, it has its own chrome lower hopper for storing ground coffee.

GRINDING CAPACITY

120kg/hour - Turkish Coffee
180 kg/hour - Espresso
240 kg/hour - Drip Coffee

03 MASTER SILOS

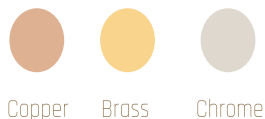

03 MASTER SILOS CYLINDRICAL DISPENSERS

Cylindrical Coffee Bean Dispensers are manufactured by Kuban. Faucet and lid parts the silo are made of stainless steel and its body material is acrylic. The dispenser has integrated bracket and it can be wall-mounted.

Coffee beans are preserved against external factors which can affect freshness of coffee beans such as damp, air, heat etc. It is perfect solution for dispensing and displaying in supermarkets, coffee shops, cafes.
